

JUNIOR ANIMATOR GUIDE — V6

1. 🎯 OBJECTIVE

Produce short AI-generated videos (1–2 minutes), composed of multiple shots.

Each shot must communicate one clear idea, show one dominant visual element (anchor), and include one micro-action.

Priority: Clarity > Consistency > Speed > Visual quality.

2. 🎯 FINAL EXPECTATION

A correct shot is instantly understandable (<1 second), focused on one visual element, simple and mobile-readable, consistent with other shots, and slightly animated (micro-action only).

3. 🧠 CORE SYSTEM

Each shot follows: Line → Anchor → Shot.

Line = narration (voice + subtitles).

Anchor = key visual element.

Shot = how the anchor is shown with a micro-action.

This is non-negotiable.

4. 🟠 GOLDEN RULES

One idea per shot.

Anchor visible in <1 second, concrete, dominant.

One micro-action per shot.

No static images. No complex animation. Simplicity over beauty.

Frame composition includes foreground (anchor), background, and depth.

If not understood in <1 second → wrong.

5. 🔁 EXECUTION WORKFLOW

Pipeline: Storyboard → Pattern → Prompt → Generate → Animate → Voice → Subtitles → Validate.

1. Read full episode (do not generate immediately).
 2. Identify Line, Anchor, and type (Action / Reaction / Reveal / Tension / Transition).
 3. Select pattern (see Section 6).
 4. Build prompt (see Annex).
 5. Generate image (anchor visible instantly, composition clear).
 6. Add one micro-animation.
 7. Add voice (match duration).
 8. Add subtitles (match voice, readable).
 9. Validate (one idea, clear anchor, readable, consistent).
 10. Move to next shot.
-

6. PATTERN SELECTION (PRACTICAL)

Ask: “What is physically happening on screen?”

- Someone interacts → HAND / OBJECT
- Someone moves → FOOTSTEP / PATH
- Someone reacts → EYES / HEAD
- Something appears → REVEAL / SHADOW
- Nothing moves but tension → STILLNESS

Rule: if you hesitate, your pattern is too abstract → choose a more concrete one.

Example: “He is scared” → ❌ abstract → ✅ EYES — REACTION.

If multiple actions exist, choose the one the viewer must focus on.

7. PROMPT PRINCIPLE

Prompts are built using: Character + Action (Pattern) + Environment + Style + Lighting.

You MUST use prebuilt prompts blocks from the Annex.

Do NOT invent prompts from scratch when you can reuse.

Ideally, only modify character and environment.

8. STYLE SYSTEM

Same style, lighting logic, and color palette across all shots.

Choose one lighting per scene (dark / neutral / intense).

Optional: cinematic framing, depth of field, separation.

9. CONSISTENCY SYSTEM

Reuse EXACT same character descriptions (copy-paste).

Keep environments stable and recognizable.

Maintain consistent lighting and visual logic across shots.

Create a “Character Library” file and reuse it systematically.

10. SERIES-LEVEL SYSTEM

Episodes are part of a continuous story.

Maintain consistency across episodes: characters, clothing, proportions, lighting, environments.

Reuse assets: prompts, environments, characters, lighting setups.

Maintain an asset library. Reuse instead of recreating.

Result: faster production ×2–3, fewer errors.

11. TIMING & WRITING RULES

Shot duration: 3–5 seconds.

Episode: 75–90 seconds.

Line duration = shot duration.

Short ≈3s, medium ≈4s, long ≈5s.

Writing rules: expand for rhythm only (no new meaning), everything must be visible, one idea per shot, add flavor not facts.

12. 🎧 AUDIO & SUBTITLES

Voice must match shot duration exactly, natural pacing, clear articulation.

Subtitles must match voice, be readable in one pass, and remain concise (~10–12 words).

If unreadable → split. If too fast → slow down.

Avoid monotone voice; slight variation improves retention.

13. 🛠️ TOOLS & COST-OPTIMIZED STACK

Objective: high volume (10–20 videos/day), near-zero tools cost per video.

Recommended:

- ComfyUI (image generation)
- DaVinci Resolve (editing)
- Kdenlive (lighter editing)
- Coqui TTS (voice)
- Aegisub (subtitles)
- FFmpeg (automation)

Allowed paid tools (only if faster and negligible cost): CapCut, ElevenLabs.

Rule: if cost scales with production → reject.

14. 🚫 FAILURE HANDLING

Level 1: regenerate (max 2 times).

Level 2: simplify prompt.

Level 3: change pattern.

Level 4: escalate.

Max 2–3 minutes per shot.

15. 📊 SCORING GRID

Shot (/20): Anchor (5), Idea (3), Action (3), Readability (5), Consistency (4).

Episode (/50): Shot avg (20), Consistency (10), Flow (10), Speed (10).

Performance:

45–50 ready;

40–44 good;

30–39 supervised;

<30 unusable.

Auto-reject: invisible anchor, static shot, multiple ideas, inconsistency.

Score each shot BEFORE assembling the full episode.

16. CHECKLIST

Anchor?
Visible instantly?
What moves?
One idea?
Consistent?
If doubt → redo.

17. PERFORMANCE TARGET

Beginner: 60–90 min/episode.
Week 2: 30–45 min/episode.
Week 3: 20–30 min/episode.
Week 4+: 15–20 min/episode.
The acceleration comes both from your training and from the optimization of libraries and the reuse of parts.

18. FINAL MINDSET

Do not think like an artist. Think like a system operator.

FINAL RULE

Each shot must answer: “What is the ONE thing the viewer must see?”

ANNEX — PROMPT SYSTEM (FULL + EXAMPLES)

A. HOW TO BUILD A PROMPT

Structure: Character + Pattern + Environment + Style + Lighting.

Always use full prompts. Never use pattern alone.

B. EXAMPLE (REFERENCE PROMPT)

young man, short dark hair, neutral clothes,
close-up of a hand suddenly grabbing another wrist, strong tension,
cinematic lighting, high contrast, sharp focus on hands, shallow depth of field,
inside a dark room, minimal light,
manhwa style, detailed linework, cinematic composition, high contrast shadows,
low key lighting, deep shadows

C. FULL PROMPT LIBRARY (EXTRACT)

(Use these directly, when possible, modify ONLY character + environment)

HAND — GRAB

young man, short dark hair,
close-up of a hand suddenly grabbing another wrist, strong tension,
cinematic lighting, high contrast, sharp focus on hands,
dark interior,
manhwa style, dramatic shadows,
low key lighting

EYES — REACTION

young man,
extreme close-up of eyes reacting, subtle emotion, reflection in pupils,
dark room,
cinematic style,
low key lighting

OBJECT — REVEAL

young man,
close-up of object revealed in hand, slight rotation, light reflection,
dark interior,
cinematic style,
low key lighting

This library will progressively grow as we add more specific variations.

Example of developed library:

◆ PATTERN 1 — HAND GRAB (10)

young man, short dark hair,
close-up of a hand suddenly grabbing another wrist, strong tension,
cinematic lighting, high contrast, sharp focus on hands, shallow depth of field,
dark interior,
manhwa style, dramatic shadows,
low key lighting

adult woman, neutral clothes,
close-up of a hand grabbing a wrist tightly, visible tension, cinematic lighting,
indoor room,
manhwa style,
dramatic lighting

man, rugged face,
hand gripping forearm firmly, tension visible,
dark alley,
high contrast style,
low key lighting

teen boy,
quick wrist grab, motion blur, urgency,
night environment,
cinematic style,
dark lighting

young woman,
tight hand grip, emotional tension,
minimal room,
soft shadows,
low lighting

adult male,
sudden arm grab, strong force,
neutral interior,
cinematic shadows,
dramatic lighting

teen girl,
hand grabbing sleeve, tension,
simple environment,
high contrast,
dark lighting

man,
firm grip on arm, sharp focus,
dark space,
cinematic framing,
low key lighting

adult woman,
wrist grabbed suddenly, pressure visible,
indoor setting,
dramatic shadows,
low lighting

young man,
forceful wrist grab, high tension,
dark background,
cinematic style,
low key lighting

◆ PATTERN 2 — EYES REACTION (10)

young man,
extreme close-up of eyes reacting, subtle fear, reflection in pupils,
dark room,
cinematic style,
low key lighting

adult woman,
eyes widening slightly, emotional reaction,
neutral background,
soft shadows,
dramatic lighting

man,
eyes narrowing, tension rising,
dark environment,
high contrast,
low lighting

teen boy,
eyes shifting quickly, nervous reaction,
simple setting,
cinematic shadows,
dark lighting

young woman,
eyes blinking slowly, tension,
indoor scene,
soft shadows,
neutral lighting

adult male,
intense stare, slight pupil movement,
dark background,
high contrast,
low key lighting

teen girl,
eyes reacting with fear,
minimal environment,
soft shadows,
low lighting

man,
eyes fixed, silent reaction,
dark space,
cinematic style,
low lighting

young woman,
close-up eyes shifting focus,
neutral setting,

cinematic shadows,
dramatic lighting

adult male,
eyes reflecting light, subtle emotion,
dark interior,
high contrast,
low key lighting

◆ PATTERN 3 — OBJECT REVEAL (10)

young man,
close-up of object revealed in hand, slight rotation, light reflection,
dark interior,
cinematic style,
low key lighting

adult woman,
object appearing in palm, dramatic shadows,
neutral background,
soft light,
cinematic style

man,
object held tightly, reflection visible,
dark room,
high contrast,
low lighting

teen boy,
object slowly revealed, subtle motion,
simple setting,
cinematic shadows,
dark lighting

young woman,
object highlighted by light, central focus,
minimal background,
dramatic lighting,
high contrast

adult male,
object isolated in frame, strong emphasis,
dark environment,
cinematic style,
low key lighting

teen girl,
object gently revealed,
neutral space,
soft shadows,
low lighting

man,
object glowing slightly, focus center,
dark room,
cinematic shadows,
low lighting

adult woman,
object turning slowly, reflection visible,
indoor setting,
soft shadows,
neutral lighting

young man,
object presented in hand, strong focus,
dark interior,
high contrast,
low lighting
